

The Yolo Democrat
With Weekly Supplement.
OFFICIAL PAPER OF YOLO COUNTY.

FOR PRESIDENT IN 1880:
SAMUEL J. TILDEN
AND FOR VICE-PRESIDENT,
THOS. A. HENDRICKS.

WOODLAND, CAL.
Thursday, June 7th, 1877.

A SURVIVOR OF THE STEAMER GEO. S. WRIGHT.

Our readers doubtless remember the loss of the north coast steamer Geo. S. Wright, which occurred two or three years ago, and that all on board were supposed to be lost. It now transpires that a boat load of seven persons, including an Indian, reached land near Cape Caution, and were all, except the Indian, murdered by armed natives. The sole survivor, the Indian Coma, has at last been discovered and brought to Victoria, Van Couver Island. The Colonel of June 3d says that since the disaster Coma has constantly evaded the Police, but that after his arrest he confessed to the Superintendent of Police, after being duly cautioned, that at night the boilers of the steamship exploded, and she began to sink at once. Captain Anstey, with four United States officers and a passenger, got into a boat, and told Coma, who was on deck, to get in too. The rest of the people were in bed, or tried to escape by means of another boat. The Captain's party, seven in all, pulled ashore near Cape Caution. A day or two afterwards three canoe loads of Indians came to the spot, and Captain Anstey offered the leader five hundred dollars to convey the shipwrecked men to Fort Rupert. Four of the Indians were armed with muskets, with which they killed all the whites, tied stones to the bodies and sank them in deep water. They robbed the bodies of all valuables, including the Captain's gold watch and chain. They spared Coma, but told him that if he ever dared to narrate the circumstances they would kill his father. Coma thinks that all the people who were in bed at the time of the explosion were drowned, as the boat went down rapidly. The prisoner was confronted to-day by the four prisoners who were brought by the *Rocket* and have since been in jail here, and identified two of them as belonging to the murderers.

HOW THE FIGHT STANDS.

The San Francisco *Argonaut* is no friend of Senator Sargent now, whatever the relations of its chief editor and the Senator may have been heretofore. Indeed the *Argonaut* has said some very damaging things about Mr. Sargent—that is to say, damaging to his chances for reelection. The issue of that paper dated June 2d, contained the following paragraph, in regard to his prosecutions of the *Chronicle*, placed under its editorial head:

"The San Joaquin Grand Jury refused to indict the *Chronicle* for libeling Senator Sargent. Messrs. Sargent and Page having challenged the *Chronicle* to a deadly combat, having the selection of grounds and the choice of weapons, the words of the *Chronicle* were not only not libelous, but they were patriotic and sympathetic, their tones and phrases to whistle their courage up, have been worsted. First blood for the De Yoncos. Indictments have been found in El Dorado county, where Page lives, but the result will be abortive: Popular sympathy is for the *Chronicle*. Popular indignation for the Republican party ring-leaders. Twelve impartial men cannot be found, and any one party California who will convict any newspaper for anything that has yet been uttered against Sargent or Page."

AFTER THE "CHRONICLE."

Senator Sargent and Representative Page are prosecuting the San Francisco *Chronicle* relentlessly for libel in different counties of the State. Indictments have already been procured in several counties, and the end is not yet. This is a rather serious row to be kicked up in the Radical family just on the eve of an important election. Democrats can look on with satisfaction, however, and see them cut one another's throats, thereby leaving a clear field for their opponents.

THE WAR NEWS.

Quintessence dispatches enable us to keep our readers posted as to all the principal movements of the Russian and Turkish troops, to give the battles reported and all other matters transpiring several hours in advance of any other paper.

Election Frauds in San Francisco.

The report of the United States Grand Jury on the election frauds in San Francisco, says that frauds were found, but the act cannot be traced to any persons. The names of a large number of dead men have been voted each year. In the opinion of the jury the frauds were not the result of a combination, but of petty greed. The names of thirty persons were found repeated, but the jury were unable to ascertain who did the repeating. It is urged that the Board of Supervisors take steps to select all the names on the Great Register not based on proper affidavits, and have the register rechecked. The abolishing of the Great Register is recommended, and that precinct registers, to contain not more than 300 names each, be substituted.

War Maps.

Nearly all the daily papers are sending out gratis to their subscribers war maps, to enable them to better understand the seat of the Eastern war now raging between Russia and Turkey, and to comprehend by the aid of these maps, the movements of troops, the locations of battles, etc. But the best of all the war maps we have yet seen is one just received with the *S. F. Examiner*, which is well colored and distinct, and apparently very accurate.

Latest Telegraphic News.

Associated Press Special Dispatches to the Daily Democrat.

High Water Prevents Crossing the Danube.

LONDON, June 4th.—It is thought to be hardly possible that the Russians can cross the Danube in the next three weeks on account of high water.

Superiority of Russian Management.

The campaign will probably be prosecuted during the heat of summer. General opinion is adverse to the Russians in numbers, organization and strategic ability is clearly shown.

Russians on the Danube—Turks in Asia Badly Disciplined.

Forty thousand Russians are in position on the Danube—not counting the reserves.

The Turkish army on the Asiatic side is badly neglected and far worse disciplined and provided for than the forces on the Danube.

A Village Surprised—No Quarter Given.

LONDON, June 4th.—A dispatch from Erzeroum says 4,000 Turkish and Circassian cavalry under Mirza Pasha, unsupported, rested over night at Beklikah where they met the Russians, who were well organized and powerful. They surprised a village, where terrible carnage followed.

The Circassians fought desperately, and no quarter was given.

The Sultan is reported to have given up all hope, and also of receiving any aid from the English Government.

The Russians are advancing in force toward Drabik.

The war party have arrived at the front.

Honors to General Grant.

Unprecedented honors have been bestowed upon General Grant in England. A banquet has been given him at the Old Waterloo Chamber by the Duke of Wellington which was unprecedented in the courtesies extended to him. General Grant is held in high esteem by England.

The Mexican Border Raids.

WASHINGTON, June 4th.—Gen. Otis thinks the Mexican border raids have not been exaggerated. Twenty or thirty persons have been killed during the last eight months. The raids are increasing.

Report from the Black Hills.

CHICAGO, June 4th.—A ten-stamp mill in the Black Hills gold region, in a nine days' run turned out \$7,000.

Union, South Carolina Burned.

COLUMBIA, S. C., June 4th.—The entire business portion of the town of Union, South Carolina, was burned last night. Loss, \$100,000.

Attempt to Rob a Railroad Train.

ST. LOUIS, June 4th.—Obstructions were placed in the track of the St. Louis Railroad last night which banked the engine, killing the engineer and fireman, and throwing the train down an embankment of fifty feet.

Turkish Attack Expected on Sogaru.

LONDON, June 4th.—A dispatch to the *Times* from Danilgrad states that the Turkish forces at Podgoritz—about fifteen battalions—have advanced to Sogaru, probably with the intention of attacking Sogaru.

A hard fight is expected at Krustaz.

Four hundred and fifty insurgents and Montenegrins attacked the village of Krustaz on the 31st and destroyed the village. Turkish loss, 148 killed. Montenegrin loss, 11 killed and 19 wounded.

Kalafat Threatened.

BUCHAREST, June 4th.—Information received by the government is to the effect that Osman Pasha intends attacking Kalafat in force.

Defeat of Circassians Exaggerated.

LONDON, June 4th.—The story of the destruction of Mousa-Pasha's Circassians is an exaggeration. Russian official accounts say the Circassians were dispersed, losing 83 killed out of a total of 4,000 engaged, more probable than that nearly 4,000 irregulars were slaughtered.

The Campaign in Asia Practically Settled.

LONDON, June 4th.—The *Standard's* Constantinople correspondent says the date of the campaign in Asia is practically settled. Mousa-Pasha is about to fall back on Erzeroum. The Russians are advancing in force, and there is nothing to prevent them from getting possession of the Euphrates Valley.

Reports from Turkish sources are exceedingly hopeful.

Localization of the War.

British intervention seems at present the most unlikely thing in the world. The only dangers now apparent to prevent the localization of the war are participation of Serbia and Greece.

Notley, the Historian.

LONDON, June 4th.—The remains of the late John Lubbock Notley were interred to-day in the grave beside that of his wife, in the Kensal Green cemetery.

Peruvian Piratical Ship Attacked by British War Vessels.

LONDON, June 4th.—The following has been received at the Admiralty from Iquique, June 1st: The Peruvian rebel pirate ship *Huascar* committed piratical acts against British subjects. Her Majesty's ships, *Shah* and *Ametyst*, engaged her in Hilo on the 29th of May. She escaped after dark but was so damaged as to surrender to the Peruvian Squadron.

Condition of the Pope.

ROME, June 4th.—The Pope had to withdraw yesterday from an audience on account of exhaustion.

Twelve thousand troops of the garrison were reviewed yesterday in Rome by King Victor Emmanuel. The city was illuminated.

At the ceremony at San Pietro in vincoli, there were present 190 Bishops and representatives from France, Portugal, Belgium, Bavaria and Brazil.

Bank Robbery.

NEW YORK, June 4th.—The National Exchange Bank was robbed of a package containing \$10,000 Saturday afternoon. A boy made some inquiries of the Cashier which necessitated opening the gate, and while his back was turned the boy got away with the money.

There were refreshing showers yesterday. Weather still warm, thermometer marking over 80.

There were over 100,000 visitors at Central Park yesterday.

Clergyman Murdered.

FREDERICK, Md., June 4th.—An investigation reveals that Rev. J. M. Friday of Harper's Ferry was murdered and thrown into the water, it is supposed by a band of ruffians from Virginia.

Emperor Nicholas Determined to Enter Constantinople.

LONDON, June 4th.—From reliable sources it is stated that Duke Nicholas says that neither Bismarck nor

Lord Derby can prevent us entering Constantinople.

LeNord, a Russian organ, says: "If after crossing the Danube he is able to restore peace, he will be willing if the Powers agree. Toward Turkey he manifests a firm attitude, but thinks that then an equitable peace may be arranged."

The Turks Claim a Victory.

LONDON, June 5th.—The Turks claim that they drove the Russians in the neighborhood of Sukum-Kaleh, thirty hours from Mt. Elbistan, but this is denied by the Russians.

The Russians have forced the Sullia mouth of the Danube.

The communian Forces.

LONDON, June 5th.—It is reported that part of the Roumanian forces have disbanded and that the remainder will probably be dismissed within a fortnight—cause, emptiness of the Treasury.

Island of St. Thomas.

NEW YORK, June 5th.—A Lisbon dispatch is authority for the statement that a conspiracy has been discovered on the island of St. Thomas for the separation of the island from Portugal. Arms and documents have been found in possession of a Portuguese merchant, who has since committed suicide.

Despatches from Mexico.

MEXICO, June 5th.—A dispatch from Mexico City says that a terrible tornado occurred here yesterday. There were sixteen persons killed and twelve are missing. Half a million dollars worth of property was destroyed.

The buildings left are burning.

The fire threatens to destroy the remainder of the town. The Court house, school houses, and other public buildings, a large number of residences were blown down.

The Mexican Raids.

CHICAGO, June 5th.—Instructions to General Otis in regard to the Mexican raids, express the determination of the President to suppress the raids at any cost. He says nothing of either annexation or war, and has intention of stirring up outside troubles.

Hayes on the Silver Question.

WASHINGTON, June 5th.—Hayes expressed himself in regard to silver legal tender, and manifests surprise and regret that Governor McCulloch vetoed the Illinois Silver Bill.

Nevada Prisoners Sentenced.

VIRGINIA CITY, June 5th.—A Eureka dispatch from White Pine says that the White Pine murderers were sentenced as follows: Roach, imprisonment for life; Leonard, for ten years and Crawford for seven years.

Fatal Kings Accident.

OAKLAND, June 5th.—The stage from Oakland to Lafayette, yesterday, ran off an embankment near Lafayette, sixteen feet in depth into the water, drowning the proprietor.

Another passenger sustained a broken thigh, and a lady and gentleman are said to be fatally injured.

Heavy Fighting Reported.

LONDON, June 5th.—News received at the Russian headquarters in Asia is that heavy fighting has taken place at Otur, on the Lower Badur river, but no details are given. The fight arose from a misunderstanding of Alsacians to pass the river.

Turkish Reverse.

CETTINE, June 5th.—There was a battle to-day near Maljat, lasting several hours. The Turks were defeated, and lost 500 men. The Montenegrin losses not ascertained.

Turks Aggressive on the Danube.

NEW YORK, June 5th.—A special from Bucharest says that the Turkish possession of the heights in the rear of Giugevo and opened fire on the enemy this morning. The accuracy of the Turkish fire was remarkable. The boats were destroyed by it, and it seems evident that they have some gunners of other than Turkish extraction directing their cannon.

The Reverse Before Kars.

MANCHESTER, June 5th.—A Vienna dispatch says: The Turks exaggerated their troubles. It is believed that the main body of the Russian center is still near Kars, and that the recent panic of Erzeroum was provoked by a flying corps of Cossacks and irregulars.

The Car Does Not Want Territory.

LONDON, June 5th.—A dispatch from St. Petersburg says: Prince Gortchakoff's note to Lord Derby, of which Count Schouvaloff is the bearer, states that the Car does not want any territorial increase in Europe, but only desires autonomy for Bulgaria, and the independence of Roumania and Servia. He demands the return of Armenia from Byzantium to the coast, but not including Erzeroum.

The Suez Canal.

LONDON, June 5th.—Great Britain has declined the proposal of M. De Lesseps to keep the Suez Canal open to all nations, and has intimated to Russia that an attempt to blockade or otherwise interfere with the Canal or its approaches would be regarded by England as a menace incompatible with the maintenance of the British attitude of passive neutrality.

Surrender of Revolutionary Leaders.

LONDON, June 5th.—A dispatch from Lima states that Don Nicolas de Pirola, the revolutionist, and his suite, surrendered themselves to the Peruvian authorities with the iron-clad ship *Ruazur*, which his partisans had seized.

Negotiation.

NEW YORK, June 5th.—The *Tribune* says, Sherman's rule that no two members of the same family shall hold office in the Treasury Department will be rigidly applied in all cases where two or more blood relatives are now employed.

The Illinois Tornado.

CINCINNATI, O., June 5th.—Mt. Carmel, struck by a tornado last evening, has 3,000 inhabitants on the Cairo and Vincennes Railroad. The Court house, two newspaper offices, three churches, two school houses, twenty business houses and a hundred residences, were destroyed or damaged either by the wind or fire. The loss is estimated at from \$300,000 to \$500,000.

New Orleans Lottery Drawing.

NEW ORLEANS, June 5th.—Gen. Jubal Early is drawing the numbers. He drew the \$100,000 prize; number 34,754 drew the \$50,000, and number 37,419 drew the \$10,000 prize.

Reward Offered for Train Wreckers.

ST. LOUIS, June 5th.—The St. Louis and San Francisco Railroad Company have offered a reward of \$1,000 for the apprehension of any of the desperadoes who attempted to wreck and rob the train on that road on Sunday night.

Trains Delayed.

LONDON, June 5th.—Trains on the different railroads are delayed by caterpillars. The track is covered with millions. The track is covered with millions.

The Turks Deficient in Munitions.

LONDON, June 6th.—The *Times* says Turkish army is deficient in munitions, and has 400 cannon lying idle. She also wants horses for her multitudes of dragoons. There is no money with which to mount them and sup-

ply proper armament. The troops are the only thing perfect.

Trustworthy information states that the army of the Danube, 200,000 strong, lacks almost everything, excepting in organization. The Generals are considered mere puppets and in hands of ignorant upstarts accomplish little or nothing. The authorities have called a council of war.

It is probable that the Russians will soon force a passage across the river, but not without great loss of troops.

The Greek Patriarch recommends the faithful Sultan.

Sulleman Pasha has taken the Montenegro position. At Kristidhe after a desperate fight his forces were routed with considerable loss.

The London Times thinks the war thus far is adverse to the Turks, and that it is quite possible that Serbia will commence war against the Turks when the Russian cross the Danube.

Reception to Grant.

LONDON, June 6th.—Pierpont's reception to General Grant was a superb affair. Her Majesty's Cabinet were all present.

Vesuvius on Fire.

LONDON, June 6th.—Mt. Vesuvius is in a state of eruption throwing fire and smoke from the crater.

The Shoshone Indians Starving.

CHICAGO, June 6th.—The Indian supplies at Green river have failed owing to the neglect of somebody. Unless relief is quickly sent them there will be great suffering.

The Illinois Tornado.

CHICAGO, June 6th.—The gale at Mt. Carmel did not exceed two minutes in duration. The velocity of the wind was estimated at 130 miles an hour. Seventy families are made homeless. The number of killed and wounded will probably reach 80. Loss in property estimated all the way from \$100,000 to \$500,000. There are 80 buildings in ruins.

The Sweeney Case.

NEW YORK, June 6th.—The Sweeney case has been compromised by his paying \$250,000 fine.

The Vacaville Fire.

VACAVILLE, June 6th.—Half the town was destroyed by fire Monday. Loss, \$50,000.

Two thousand bushels of grain was destroyed by fire last night near Nicklaus.

WHAT OUR COTEMPORARIES SAY OF THE DAILY DEMOCRAT.

Below we append the expressions of the press upon the appearance of a daily paper in Woodland. Brethren of the quill, please accept our thanks for your kindly greeting:

A WOODLAND DAILY PAPER.—We have received the first number of the WOODLAND DAILY DEMOCRAT, Wm. Saunders editor and proprietor. Mr. Saunders is well known as a publisher of the excellent weekly, *The Yolo Democrat*, and it affords us pleasure to note that he has found journalism so pleasant and profitable as to justify a daily issue. Woodland is a pretty and prosperous town, in the center of the rich agricultural district, and this neat and well-conducted journal will do much to accelerate its growth and to add to its prosperity. Politically the *Democrat* bears out the name of *Yolo Democrat*, and we are glad to see the first number of the WOODLAND DAILY DEMOCRAT has come to hand. It is a neat paper, well made up, and is published by Wm. Saunders of the WEEKLY DEMOCRAT. It contains the telegraphic news, is to be published every morning except Saturday, and promises to be a credit to the town of Woodland if it is properly supported by the people of that thriving locality.—See *Daily Bee*, June 2d.

"WOODLAND DAILY DEMOCRAT."—We have just received the first number of this paper, issued in connection with the *Yolo Democrat*, by William Saunders. It is a trade paper, larger than the *Daily Register*, contains a graphic news, and is to be published every morning except Saturday. Though it would be less expensive to conduct an evening paper, there is probably a greater demand in Woodland for a morning edition, and we have no doubt but that Bro. Saunders will succeed in establishing a first-class daily paper. Patronage extended to such an enterprise, helps the individual, the local interest, the community, and the State. In comparison to the benefits reaped by the community that in this manner advertises its thrift and public spirit.—*Napa Daily Register*, June 2d.

We are in receipt of the first number of the WOODLAND DAILY DEMOCRAT, published at Woodland from that well known stand-by, the weekly or bi-weekly paper. We are glad to see this exclusive evidence of the success of the *Democrat's* daily edition, and glad to be able to congratulate its proprietor on so creditable a success. It presents a very neat appearance, and we are confident that it will be a valuable addition to the list of our exchanges.—*Yolo Democrat*, June 4th.

ANOTHER GOOD EFFECT.—Ten years ago the town of Woodland was a mere hamlet, a few scattered houses, a few scattered farms, a few scattered people. It has since grown into a city, and its growth has been healthy, and continues full of promise. With a view to the present needs of the place, and with an abiding faith in its future, we are glad to see the first number of the WOODLAND DAILY DEMOCRAT, a paper which will be a credit to its proprietor, and a benefit to the community.—*Yolo Democrat*, June 4th.

WE have received the first number of the WOODLAND DAILY DEMOCRAT, published at Woodland from that well known stand-by, the weekly or bi-weekly paper. The Yolo Democrat.

Thursday, June 7th, 1877.

General News Items.

Four inches of snow fell at Eureka, Nevada, Monday night, May 28th.

The tidal wave on the southern coast rose in some places to a height of 40 feet, doing an immense amount of damage.

A party of disguised men took a negro from the jail at Louisville, Kentucky, Sunday night, and hanged him to a tree.

The N. Y. Sun says: The Hon. Samuel J. Randall says that the Democrats are sure to carry Pennsylvania at the next election.

The Statist for May is to hand, an excellent statistical monthly, published by L. P. McCarty, San Francisco at \$4 a year.

Thirty persons have been drowned by the wreck of a vessel between Adelaide and Albany, on the northeast coast of Australia.

Thursday, June 14th, will be the one hundredth anniversary of the adoption of the State and Session of the American Flag. Long may it wave.

A millionaire in San Francisco has just paid \$700 for kissing the family members; yet people will persist in saying that prices are going down.

The severest shock of earthquake that has occurred for years at Paso Robles was on the 26th inst., rolling people about in their beds, but doing no serious injury.

Five of the parties who were convicted of murdering Chinamen at Chico, were taken to the State Prison on the 25th, to serve out their sentences, which aggregate 12 1/2 years.

At the dog show in New York, the entries numbered about fifty hundred, and among the finest specimens of all the varieties, one of the English setters, Rob Roy, being valued at \$5,000.

The honey crop of the Southern portion of the State, like other crops there, will be very scant. The bee keepers are suffering great losses from their stock, the bees perishing from scarcity of food.

Governor Irwin on Wednesday commissioned H. G. Hart as a Notary for Yolo county, to reside at the California Quicksilver Mines, vice John S. Lamberti, removed from the county.

It is intended by the trustees of the Lick estate to begin at an early day the work upon the construction of the foundation for the great observatory.

About 120 feet of the trestle near Howard's Station, on the North Pacific narrow-gauge railroad, was freed by incendiaries last Sunday morning about daylight. No clue to the perpetrators of the dastardly act has been obtained.

The San Francisco News says that the total length of railway lines through the principal countries of the world now reaches a circumference of nearly fourteen times the circumference of the globe, or one and a half times a journey to the moon.

President Hayes has appointed the Right Rev. Bishop Kip, of California, to be one of the Board of Visitors for the examination of the United States Naval Academy at Annapolis. Bishop Kip leaves for the East to-day or to-morrow.

The London Times says: It has been very commonly remarked lately that the speculative movements in Russian stock at one time exceeded in the aggregate many times the nominal amount of the Russian 1873 loan of \$75,000,000.

The New York World recently had this dispatch from Washington: A bill will be introduced in the coming Congress reducing the army to 10,000. The Indian war is ended, and neither Sherman nor Sheridan believe it will be resumed.

It now takes in Russia two dollars in paper money to equal a dollar in gold, and four dollars in Turkish money is only equal to one of gold. How much further the depreciation will go if the war is protracted it is impossible to calculate.

George M. Pinney was arrested in San Francisco, May 28th, on charges of embezzlement and forgery, and held in the city jail. He is charged with the embezzlement of \$30,000, in default of which he is liable to one of the "tank cars" of the City Prison.

The President has appointed James E. Anderson, of Ohio, United States Consul at Peking. Hayes is different from Grant, in that he makes all his appointments from his own State, while Grant simply honored his relatives with positions.

A Constantinople dispatch says the Akkadians are in full insurrection. Arms have been distributed among them. The Sultan has ordered the purchase of 20,000 revolvers, to be paid for out of his private purse, for distribution in the Caucasus.

We learn that the management of the Catholic Fair and Festival, which was held Monday, Tuesday and Wednesday nights of this week, resulted in adding quite a respectable sum to the Church fund, and that the satisfaction expressed is universal.

Santa Rosa has one woolen mill and is now talking of establishing another. When will Woodland move in this matter? It is an industry that would pay well in so good a wool growing locality as is to be expected, and it would help our young city amazingly.

The oak, walnut, cherry, ash, poplar, maple, elm, sycamore and locust, attain a size in West Virginia that is not surpassed on this continent, and there are 10,000,000 acres covered by forests of these trees in that State, valued as they stand at \$75,000,000.

General Grant has been tendered grand ovations in England, and the strange part of it is—would be in a more modest individual than he, a citizen of a Republic, should be willing to receive such toadying attentions. But he does, and enjoys them too.

Last year the taxable property of Monterey county amounted to near \$10,000,000; this year it will be more than \$7,000,000, and perhaps considerably less. The decrease is owing to the fact that a large portion of the stock has been driven out of the county.

D. M. Knowlton committed suicide at the Blue House in San Francisco, May 21st, by taking strychnine. Deceased was Assistant Adjutant-General of the Grand Army of the Republic, and a brother of Prof. Knowlton, the well-known teacher of elocution.

The New York Tribune's Washington special says: Hayes favors the re-nomination of silver, but under such conditions as will not shake the public credit. He does not believe in the justice of the principal and latest of the debt pay able in silver.

The failure of the appropriation for the war department has had no painful effect. The war clerks have been informed that after the 1st day of July they may buy their own toilet soap, for use in the office, or go without. And yet the Government expenses clean hands of its servants!

Prof. M. W. Harrington, of Michigan University, who is now in Europe, has received an invitation from the Chinese Government College of Peking, China, to take the chair of astronomy in that institution at a salary of \$40,000 per year and perquisites, which will amount to another \$10,000.

People generally will be glad to know that cholera has been discovered to be a sure cure for burns. By laying a small piece of cold charcoal on the burn the pain subsides immediately. By leaving the charcoal on for an hour the wound is healed, as has been demonstrated on several occasions.

The Stockton Herald of Wednesday says the trade in grain sacks is springing up pretty lively. Last week 114,000 sacks came up on the Altes Carraut on one trip. This morning 50,000 more arrived, and 75,000 are due next week. There will be considerable grain handled in Stockton notwithstanding the dry year.

The Temperance people of Los Angeles have nominated a full legislative and county ticket for the coming election. Volney E. Howard, a gentleman of State reputation, and a constant and ardent supporter of the Democratic nomination as United States Senator in 1868, heads this temperance ticket as a candidate for the State Senate.

A patent has been taken out in England for paper blankets as bed coverings. They compensate for their lightness by their density, adding materially to warmth. They are performed at distances of about four inches in order to prevent ventilation, and at small sizes, 48 by 31 inches, sell at about nine cents each. Several contracts have been made for hospitals and schools.

Says the Contra Costa Gazette: The American Sultan, Brigham Young, is raising the Prophet's standard in Utah, and challenging civilization to war. He is reported to have preached a very defiant, treasonable sermon at Salt Lake Tabernacle on Sunday, and promised that the Gentiles should have blood to their hearts' content—and more than they expected and before they were ready for it.

As General Grant and his family left the steamer at Liverpool, May 28th, they were escorted with much cheer and the hospitalities of the Common Council and a large crowd of citizens received the tender with cheers. The Mayor warmly welcomed the ex-President, and extended to him the hospitalities of the town. Grant returned thanks and accepted the invitation. The party then drove off in the Mayor's state carriage.

The Monterey Californian says this, and hence it must be literally true: "Visitors to this town should be struck with the great number and unusual beauty of the girls it contains. Monterey is literally a paradise of girls. They outnumber the boys two to one. Their universal beauty is simple enough. As soon as a Monterey girl begins to show signs of ugliness she is quietly drowned. Else how could the credit of the town be preserved?"

A ship-master who lately arrived from Tahiti brought word of the remarkable presence of a French resident of the Island, in having foretold that a tidal wave would in a short time severely felt there. Last advices from the Sandwich Islands state that the predicted wave visited the large Island of Hawaii, the most easterly of the group, and caused the loss of several lives and the destruction of much property at the ports of Hilo and Waikane.

Says the Arizona Citizen: Our dispatches show that our California mail has been ordered over the railroad route to Yuma, and have been proof that the week that the order went into immediate effect. The first mail by the new route left San Francisco May 24 at 4 P.M. and reached Tucson at 8 A.M. on the 25th—making in four days and sixteen hours a journey that formerly took ten days.

This is shortening the time in a decided way. By the old route, the time was eight to ten days. Every mail under the new order comes on the short time named. Welcome more of the railway, say we.

At Walker, Sandwich Islands, the damage to the late tidal wave was frightful. The water was swept away. The steamboat and all the stores, and the dwellings houses, the bridge across the stream, and all the dwelling houses were swept away in an instant, and now lie a mass of ruins far inland. Five lives were lost, and many more were injured and had limbs broken. The body of one woman was found by the boats of the Honolulu. The boats of the American whaler Pacific, Capt. Almsmith, lying in the harbor, picked up six persons who were swimming for life in the bay. The Pacific was lying in four fathoms of water, but she grounded when the sea receded, and then was blown to pieces and the sea continued to rise and fall all day.

PANAMA, May 30th.—On May 10th a tidal wave washed the State of Guerrero, in Mexico, and rose as high as the Plaza at Acapulco. The following particulars of the tidal wave of the Southern Pacific Coast have been received: Callao was visited on the 10th instant by a species of tidal wave, or rather a gradual upheaval of the sea, which caused serious damage and exceeding alarm. The docks and piers of the Muelle Darsena were broken up, and the goods stored on the docks along the shore line which were completely carried away by the water. Vessels made fast and lying alongside the outer walls of the dock eight lifted eight feet by the upheaval, and were not damaged. Most of the steamers riding at anchor in the bay slipped their cables, fearing further danger. The United States storeship Commodore Rodgers, lying at anchor, was not damaged, but the officers in command evidently remembering the fate of her predecessor, the Fredonia, in the great tidal wave at Arica, in 1883. Quantities of merchandise temporarily stored on the docks from ships discharging were ruined by water. On the shore the greatest consternation was apparent, many families flying for refuge to the high grounds back of the town. At 10 o'clock in the morning all danger seemed passed. The sea was somewhat tranquil, and gradually resumed its ordinary character. At midnight, however, a large quantity of railway running along the shore was destroyed by the wave. At 11 o'clock the town and railway were seriously damaged, although no loss of life is reported. Beyond Monto the cable is interrupted, and there is anxiety as to the fate of Arica and Iquique. The steamer Santa Rosa, which left Arica on the 28th, reports that within minutes under way she experienced a shock of earthquake and saw the tidal wave settling toward shore. At Arica, the tidal wave was felt, but the Perfect telegraph that no damage was inflicted on the cable. From the shore there is further intelligence, yet the fact that the cable is not working leads to the belief that some great calamity may have befallen the southern ports. In such case, at the gunnery and goods from Panama to Callao and Iquique from eighty to a hundred ships, and the catastrophe must have been immense.

Tombs of Georgia.
Ex-Senator Robert Toombs of Georgia has written a letter on the affairs of the State, in the course of which he says:

The age in which we live has developed new dangers to free representative governments. Even the inventions and discoveries of genius in arts and sciences, with their new benefits and blessings to mankind, have also brought new dangers to good government. This is especially true of those inventions and discoveries which tend to increase the power of the individual, and to diminish the power of the community. The application of the electric power of steam and the utilization of electricity are largely to the promotion and distribution of wealth and the spreading of intelligence among men and nations. The improvements in the application of the electric power of steam and the utilization of electricity are largely to the promotion and distribution of wealth and the spreading of intelligence among men and nations.

1,000,000 Bottles

OF THE

Centaur

Liniments!

have been sold the last year, and not one complaint has reached us that they have not done all that is claimed for them. Indeed, scientific skill cannot go beyond the result reached in these wonderful preparations. Added to Carbolic, Arica, Mentha, Senecio, Oil and Witch Hazel, are other ingredients, which makes a family liniment that defies rivalry. Rheumatic and bed ridden cripples have by its use been enabled to throw away their crutches, and many who for years have been afflicted with Neuralgia, Sciatica, (taken Breasts, Weak Backs, etc., have found permanent relief.

Mr. Josiah Westlake, of Marysville, O., writes:

"For years my Rheumatism has been so bad that I have been unable to stir from my house. I have tried every remedy I could hear of. Finally, I learned of the Centaur Liniment. The first three bottles enabled me to walk without my crutches. I am mending rapidly. I think your Liniment simply marvelous."

This Liniment cures Burns and Scalds without a scar, extracts the poison from bites and stings, Cures Chilblains and Frost-bites, and those having valuable animals to care for, should keep a bottle of Centaur Liniment, for Cuts, Bruises, Sprains, Swellings, Itch and Catarrhs of the Skin.

The Centaur Liniment, Yellow Wrapper, is intended for the treatment of all kinds of animal diseases, horses, mules and animals.

READ! READ!
Rev. Geo. W. Ferris, Manokill, Schoharie Co., N. Y., says:

"My horse was lame for a year with a foot lock. I have tried every remedy I could hear of, and I considered him worthless until I commenced to use Centaur Liniment, which rapidly cured him. I heartily recommend it. It makes very little difference whether the case be 'wrench,' sprain, spavin or lameness of any kind, the effects are the same. The great power of the Liniment is shown in Follisville, Rhode Island, twenty Spavins, Ring-bones, Glanders, etc., were cured by the stock owners. Liverymen, Farmers, and those having valuable animals to care for, we warrant its effects and refer to any Farmer who has ever used it."

Children.

A complete substitute for Castor Oil, without its unpleasant taste or recoil in the throat. The result of 20 years' practice by Dr. Samuel Tilden's Castoria is particularly recommended for children. It destroys worms, assimilates the food, and allows natural sleep. It is a safe, reliable and agreeable medicine. It is a pleasant taste of Castor Oil renders it so difficult to administer.

Mothers who try Castoria will find that they can sleep nights and that their babies will be healthy.
